

PIR Sensor Stair Light Controller

- Multifunctional PIR sensor stair light controller features daylight sensor.
 - 32 channels constant voltage output drive low voltage LED strip, Max. 1A current per channel.
 - 2 groups same SPI(TTL) signal output, drive 28 kinds IC digital RGB LED strip, IC type and R/G/B order can be set.
- Compatible ICs: TM1804, TM1809, TM1812, UCS1903, UCS1909, UCS1912, UCS2903, UCS2909, UCS2912, WS2811, WS2812, TM1829, TM1914A, GW6205, GS8206, GS8208, LPD6803, LPD1101, D705, UCS6909, UCS6912, LPD8803, LPD8806, WS2801, WS2803, P9813, SK9822, SM16703P.
 - Easy operation with OLED display and 3 buttons.
 - four work light modes selectable.
 - Two stair light controllers can cascade.
 - Built-in multiple color mode, speed and brightness 1-8 grade adjustable.
 - Push switch can be used as induction signal input.
 - With fast self-testing function / Over-heat / Short circuit protection.
 - Any damaged LED channel in 32 channels can be set disable.
 - Can match with IR reflection induction probe (Standard) or when need accurate sensing area, can match with IR reflection induction set ES-T.

Technical Parameters

Input and Output	Sensor data	Safety and EMC
Input voltage	Sensitive field	ETSI EN 301 489-1 V2.2.3
Output voltage	Sensitivity angle	EMC standard (EMC)
Output current	Environment	ETSI EN 301 489-17 V3.2.4
Output power	Operation temperature	Safety standard(LVD)
Output type	Case temperature (Max.)	EN 62368-1:2020+A11:2020
	IP rating	Certification
		CE,EMC,LVD
		Package
		Size
		Gross weight

Mechanical Structures and Installations

Wiring Diagram

OLED screen and key operations

1. Long press M key for 2s, enter system parameters setting state, to switch four work light modes, set light off mode, push switch input function, chip type and RGB order or daylight sensor threshold.
2. Short press M key, enter current work light mode parameters setting state.
3. When in parameters setting state, short press M key to switch multiple parameters, press < or > key for parameters' adjustment.
4. Long press M key or wait 1.5s to quit parameter setting state.
5. Long press M & > key for 2s, display "Light up test" on the 4 line of OLED screen, start up direction induction light testing.
6. Long press M & < key for 2s, display "Light down test" on the 4 line of OLED screen, start down direction induction light testing.
7. Long press < & > key for 2s, restore factory default parameters, jump to language interface automatically, press < or > to switch two languages(Chinese and English), press M key to exit language interface.
8. Long press <, > & M for 2s, enter 32 channels LED disable setting interface.
9. When work in White Step/Color Flow/Color Step/White Step + Color Flow mode, the 4 line display color mode name. When the controller is in induction state, the indication of inductive signal input ("Light up start" and "Light down start") is displayed first, and then the light on/off status is displayed. If the current detected LUX value is greater than daylight sensor threshold, display "Light up off" or "Light down off" on the fourth line.

Language interface

Light on/off state on the 4 line

Inductive indication on 4 line

System parameters setting

Out: Switch four work light modes.

White_Step: Only multiple constant voltage LED strip light mode.

Color_Flow: Only 1 or 2 straight line digital pixel LED strip light mode.

Color_Step: Only multiple Z-shape digital pixel LED strip light mode.

Step+Flow : Multiple constant voltage LED strip + 1 or 2 straight line digital pixel LED strip light mode.

Chip: Select one chip type from ten options (shown in below table) one of these from 6 RGB orders (RGB,RBG,GRB,GBR,BRG,BGR). The parameters are valid only for the work modes with SPI signal output.

Def RGB: RGB hex value for user-define color. The parameters are valid only for the work modes with SPI signal output.

LuxSet: Daylight sensor threshold (10, 30, 50, 100, 150, 200lux, OFF), with sufficient ambient light, the PIR sensor does not turn on the light. Daylight sensor default off. The digital value after * is current detected LUX value.

OFF: Set 2 types of lights off and delay time at the end of sensing.

Delay sync: Lights are synchronized off with a delay time.

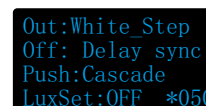

One by one: Lights turn off sequentially from the end to the head with a delay time.

Delay time: 5s, 10s, 15s, 20s, 30s, 1min, 3min, 5min, 10min, cancel. Set cancel means not turn off the light.

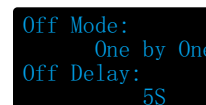

Push: Switch two kinds of push switch input modes.

Cascade: The push switch input work as cascade input/output or simulated PIR inductive input.

All-on: The push operation will turn on all light and turn off synchronously after the delay time.

System parameters interface of White step mode

Switch-off method and delay time setting

System parameters interface of White step + Color flow mode

Digital pixel RGB LED strip compatible IC types list:

IC type	Compatible IC type	Output signal
TM1809	TM1804, TM1812, UCS1903, UCS1909, UCS1912, UCS2903, UCS2909, UCS2912, WS2811, WS2812, SM16703P	DATA
TM1829		DATA
TM1914A		DATA
GW6205		DATA
GS8206	GS8208	DATA
LPD6803	LPD1101, D705, UCS6909, UCS6912	DATA, CLK
LPD8803	LPD8806	DATA, CLK
WS2801	WS2803	DATA, CLK
P9813		DATA, CLK
SK9822		DATA, CLK

LED channel output disable setup

ch: the channel which is set
1: enable the channel to work
0: disable the channel

For example: If the fourth channel output is damaged, please long press M, < & > key to enter LED disable interface, then change the corresponding channel(04) from 1(on) to 0(off). namely the damaged channel can be ignored.

1. White Step mode(Constant voltage LED strip light mode)

```
White Step
Step:032 Bri:8
Mode:01 Speed:6
ON one by one
```

Step: Total step number, 008-032
Mode: White mode number, 01-04
Bri: Brightness grade,
 1-8, 8 is the brightest level.
Speed: Speed grade,
 1-8, 8 is the fastest speed.

White mode list:

No.	Name
01	ON one by one
02	All OFF, Five ON
03	All ON, one OFF
04	All ON

2. Color Flow mode (Straight line digital pixel LED strip light mode)

```
Color Flow
Dot: 300 Bri:8
Mode:09 Speed:6
Color queue
```

Dot: Pixel dot number, 032-960
Mode: Color mode number, 01-12
Bri: Brightness grade,
 1-8, 8 is the brightest level.
Speed: Speed grade,
 1-8, 8 is the fastest speed.

Color mode list:

No.	Name
01	Red
02	Orange
03	Yellow
04	Green
05	Cyan
06	Blue
07	Purple
08	White
09	Color queue (7 color + White)
10	Color chase(7 color + White)
11	Color fade (6 color flow)
12	Rxxx Gxxx Bxxx (User define)

3. Color Step mode(Z-shape digital pixel LED strip light mode)

```
Color Step
Step:030 Dot:010
Mode:09 Speed:6
Color queue
```

Step: Total step number, 008-160
Dot: Pixel dot number of each step, 002-120
 The Step number x Dot number must < 960
Mode: Color mode number, 01-12
Speed: Speed grade,
 1-8, 8 is the fastest speed

Color mode list:

No.	Name
01	Red
02	Orange
03	Yellow
04	Green
05	Cyan
06	Blue
07	Purple
08	White
09	Color queue (7 color + White)
10	Color chase (7 color + White)
11	Color fade (6 color fade)
12	Rxxx Gxxx Bxxx (User define)

4. White Step + Color Flow mode(Constant voltage LED strip + Straight line digital pixel LED strip light mode)

```
Step+Flow
Step:032 Dot:300
Mode:09 Speed:6
Color queue
```

Step: Total step number, 008-032
Dot: Pixel dot number, 032-960
Mode: Color mode number, 01-12
 The mode number is for straight line digital pixel LED strip only.
 The mode for constant voltage LED strip is fixed on one by one.
Speed: Speed grade,
 1-8, 8 is the fastest speed.

Color mode list:

No.	Name
01	Red
02	Orange
03	Yellow
04	Green
05	Cyan
06	Blue
07	Purple
08	White
09	Color queue (7 color + White)
10	Color chase (7 color + White)
11	Color fade (6 color flow)
12	Rxxx Gxxx Bxxx (User define)

Two stair light controller cascade connection

The downstairs light controller connects Up direction PIR sensor and daylight sensor.
 The upstairs light controller connects Down direction PIR sensor and daylight sensor.
 Two stair light controllers connect cascade UP/DW line.
 After the sensing light control process is finished, wait for the delay time, the light will automatically turn off.

Note: the push switch function must be set as cascade input.

Two Push switch as up/down induction signal input connection

The under push switch connect cascade UP port of the stair light controller.
 The up push switch connect cascade DW port of the stair light controller.
 The push switch operation will ignore daylight sensor threshold setting.

When the push switch function be set as cascade input, the push operation will start induction light control process.

When the push switch function be set as All-on input, the push operation will turn on all light, and the light will turn off after the delay time automatically.

Installation of PIR sensor

Size of detector:

PIR sensor detection scope ($\pm 10^\circ$ Error):

Notice for installation of PIR sensor

1. Recommended for wall mounting.
2. If the sensor is exposed to direct sunlight, interference signal will be introduced.
3. The sensor should be installed in a dry environment and keep away from windows, air conditioner and fans.
4. Make sure that the sensor stays away from heat source, such as countertops, kitchen appliances which generate hot steam, walls and windows in direct sunlight, air conditioner, heating, refrigerators, stoves and so on.
5. We recommended the wall-mounted installation height is 1-1.5 meters and the ceiling mounting height is no more than 3 meters.
6. There should not be shelter(screen, furniture, large bonsai) within the range of detection.

★ For wall mounting and ceiling mounting, note that the sensing holes are perpendicular to the direction of human movement.

Packing List

LED Controller
